Reliable Protection for Desktop PCs, File Servers and Email

Avira Small Business Security Suite	**Avira Business Security Suite**	**Avira Endpoint Security**	**Avira Endpoint & Email Security**
For small businesses running between 3 and 100 PCs. The Avira Small Business Security Suite allows you to protect your endpoints and email communications with a single, award-winning antivirus and antispam package.	Businesses that need to guarantee security for their PCs and their file servers and email communications will find the Avira Business Security Suite to be the perfect choice.	Avira Endpoint Security brings together the protection of desktop PCs and file servers in a single license. This ensures your network is secure against viruses, Trojans, adware, spyware and other malware.	Combine the security of your workstations and file server with the protection of your email traffic. There's nothing more reliable or convenient.

SAVE UP TO 30% **Please note:** Please note: Avira's bundled security solutions are always more cost-effective than licensing the individual components. That's a cost saving of up to 30%.

Why choose Avira?

Optimal Safety

High performance protection
Powerful proprietary antivirus technology that consistently wins top awards for detection and performance.

New dangers neutralised fast
Our in-house virus lab works around the clock to prevent the latest threats.

Always on the hunt
Monitors every file access in real-time, even archives and offline VMWare images. Spots spam emails and strips out potentially dangerous content and attachments.

Fast updates do not waste bandwidth or workflow
The industry's most compact program updates and virus pattern database files automatically update via the Internet or through the network without system interruption.

Easy To Configure And Manage

Stay in control
Administer your whole network from one place using the Avira Management Console. Comprehensive notification and reporting functions are built in, integrated scheduler lets you automate routine tasks like updates when it's most convenient.

Simple, intuitive new interface
Start actions like updates and scans directly from the Avira Management Console.

Fast initial set up
Use the configuration wizard for standard installation defaults.

Easily tweak security levels
For example, you can select archive file types to check, plus adjust the recursion depth when dealing with archives or scanning runtime-packed files.

Safely isolate infected and suspicious files
Using Quarantine Management.

Preserves Your IT Budget

Big discounts off individual license costs
Plus transparent licensing, with no hidden costs or non-inclusive essential extras.

Extremely low administration overhead
"Set and forget" automated workflows, everything on every server managed from one single point.

Intuitive operation saves you time, effort and money
No need for expensive training or user education.

Free Updates and Upgrades
Your license guarantees you the latest virus and malware protection available – at no additional expense.

All inclusive
Avira Gold Support is included in the purchase price. You are not charged extra during the entire update contract period.

Won't stress your systems
Our fast, resource-saving scanning technology reduces the load on servers, networks, PCs and storage drives, so they could last longer.

System Requirements

Please see the system requirements for the individual products included under your Bundle license.
